

Ayoub Oueslati

 portfolio —  ayoubweslati00@gmail.com —  linkedin.com/ayoub-weslati —  github.com/ayouboueslati

Summary — Passionate software engineer specializing in **mobile and web development**, with strong experience in **event-driven architectures**, **AI-powered recommenders**, and **online booking/payment systems**. Skilled in building cross-platform applications and scalable backend systems using modern technologies.

Skills

Technologies WEB, MOBILE, BLOCKCHAIN

Mobile Flutter, Kotlin, SwiftUI, Ionic

Web PHP, Next.js, Symfony, JavaScript, .NET

Backend Node.js, Python, Kafka, Weaviate

OS Ubuntu, UNIX

Tools Git, Docker, Jenkins, Vagrant, Zod

Design UI/UX Design

Experience

Final Year Project (PFE) – Hendrik Thurau Enterprises, Switzerland

Jan 2025 – Jul 2025

Booking & Event Management System for Boats and Lake Tours

- Designed and developed a booking and event management system using **event sourcing architecture**.
- Implemented backend services with **Node.js**, **Python**, and **Kafka** for distributed event-driven communication.
- Integrated **Weaviate AI recommender** (multilingual-e5-large-instruct) for personalized event recommendations.
- Built a cross-platform client with **Ionic**, enabling real-time event updates and reservations.
- Developed online reservation & payment workflows within the event sourcing framework.
- Deployed services with **Docker** and enforced request validation using **Zod**.

Flutter and Node.js Development Internship, Tunisia

Jun 2024 – Sept 2024

Mobile Developer for Tabaani Travel Agency

- Developed a mobile application for a travel agency to streamline booking and trip management.
- Implemented back-end services using Node.js to handle client data and itineraries.

Flutter Mobile Development Internship, Tunisia

Jun 2024 – Sept 2024

Cross-platform Mobile Developer for "SportDivers"

- Built a cross-platform Web and Mobile application to manage schedules, attendance, and payments for a sports center.
- Integrated features such as a dashboard, chat module, and online payment system.

Computer Science Internship, Tunisia

Aug 2021 – Sept 2021

Intern in the Electronic Payment Department

- Worked on projects related to electronic payment systems.
- Gained expertise in optimizing electronic payment processes.

Education

Private Higher School of Engineering and Technology

Software Engineering

Minor: Mobile Development

Projects

Job Finder Platform for Renewable Energy

Oct 2023 – Dec 2023

Tech: SwiftUI (iOS), Kotlin (Android), Flutter (Dashboard)

- Developed a multi-platform platform for renewable energy job opportunities.

Iqraa (Spiritual Guide App)

Jan 2024 – Jun 2024

Tech: Flutter, VueJS, NodeJS, Python, Hedera

- Built a mobile and web application to support religious practice.

Artistic Avenue (Cross-platform App)

Jan 2023 – Jun 2023

Tech: JavaFX, Symfony, Codename One

- Created a platform for artists to display and engage with their audience.

Robotic Club Website

Oct 2022 – Dec 2022

Tech: HTML, CSS, PHP, JavaScript

- Developed a dynamic website for robotics events and projects.

DevOps Project: Automated CI/CD Pipeline

Sep 2024 – Dec 2024

Tech: Spring Boot, Vagrant, Jenkins, SonarQube, Docker & Docker Compose, Maven, Git, Grafana, JUnit, Kubernetes, Nexus

- Implemented a CI/CD pipeline for a Spring Boot application with automated testing, code quality checks, and deployment.
